How to Submit Thesis File ONLINE

1. Enter the YU library homepage (<http://libs.yu.ac.kr/>), click the [Eng] and log in.

->Default password is first 6 digit of resident registration number.

2. Click the [Submit a Thesis].

3. You can see the following picture and click the [Submit a Thesis].

The screenshot shows the Yeungnam University dCollection homepage. At the top, there are navigation links: 영남대학교, dCollection, 검색, 자료제출, 제출내역, 학회·연구소, and 제출자 로그인. Below this is a banner area with several sections. The central section, titled '학위논문제출 학회연구소 자료제출 기타자료 제출', features a green plant growing from a computer mouse. A red box highlights the 'Submit in English >>' button. To the right of this banner are sections for '정보공개 안내 (CCL이란?)', '자주하는 질문', and a 'Browse' section with links to '학과별' and '학술지'. Below the banner is a dark navigation bar with links: 전국대학자료, 우리대학자료, 검색, 고급검색, 다국어입력, and 검색도움말?. Below this is a filter bar with checkboxes for 전체, 학위논문, 학술논문, and 기타. The main content area is divided into two columns. The left column, titled '최신자료', lists recent uploads with details like '中國 唐,宋代 茶文化 研究' and '최정순, 2012, 학위논문'. The right column, titled '공지사항', lists notices such as '2012년 2월 졸업예정자 학위논문 제출기간 안내'. At the bottom, there are two bar charts. The left chart, '전국대학 디지털 자료 (단위:건)', shows data for 학위논문 (1,564), 학술논문 (3,134), 강의자료 (173), and 기타 (1,439). The right chart, '우리대학 제출건수', shows data for 2009 (445), 2010 (1,005), 2011 (940), and 2012 (534), with a legend for 전체 and CCL적용.

4. You can follow the directions for the other procedures.

THESIS/Research GUIDE

1. Overview

The thesis (or a report) is a scholarly or practical treatise that examines a specific topic or issue that is conducted by students during their graduate study. For a master's degree, all requirements, including filing a thesis or a paper and obtaining a minimum of 39 credits or 42 credits (in a case of a seminar paper), are expected to be completed within one and half years

The Park Chung Hee School of Policy and Saemaul (PSPS) sets thesis guidelines for your writing for the master's degree. Although the contents and length can be decided by you and your advisor, the School recommends you to consider the thesis guide.

2. Word limit

Master's candidates should write up a thesis of approximately 25,000–30,000 words (245 words on a double-spaced page) and a report of 15,000–25,000 words. The word limit is exclusive of words in tables, figures, references and appendices. Footnotes are included as part of word limit. In exceptional circumstances, the expected length of the thesis (or a report) can be adjusted by the advisor and head of departments.

3. Order of Contents

The following document order is recommended for a thesis or a paper:

- A. Cover
- B. Blank page
- C. Inside cover
- D. Supervisor approval page
- E. Acknowledgements (optional)
- F. Table of contents
- G. Body of text : Check with your department to determine what style is preferred.
- H. Bibliography
- I. Appendices (Optional)
- J. Abstract in Korean if your thesis is in English(2 pages maximum)

4. Guide for writing a thesis or a paper

• Abstract

Summarizes problem statements, your research methods, key results and findings and conclusions and usually does not exceed 200 words in length. One copy of abstract in Korean. The abstract should not exceed two pages. Please refer to **"Format # 5"**.

• Introduction

Introduction should include problem statements, research aims and objectives and research design. Student should write logically 'what is the topic and why is it important?'. Also, introduction should be interesting to the readers as well as you. Make the readers want to read your works. If you want to gain further information, read several thesis introductions.

• Literature review

The literature review 1) helps you identify work already done or in progress that is relevant to your work, 2) prevents you from duplicating what has already been done, 3) helps you design the method for your project and 4) enables you to find gaps in existing research, thereby giving you a specific topic. The purposes of the literature review can be summarized as follow;

1. Distinguishing what has been done from what needs to be done;
2. Discovering key variables related to your topic;
3. Identifying relationships between idea and practice;
4. Setting up the context of the topic or problem;
5. Rationalizing the importance of the problem;
6. Relating ideas and theory to applications;
7. Identifying the key methods and research techniques that have been used.

How many articles do students review? That is a matter of judgement. However, you as a researcher should be able to demonstrate your arguments based on the existing literature. For further information or knowledge, you had better read research methodology papers.

- Method

Explain the detailed procedures of research clearly. Quantitative research may include research design, research model, hypotheses and operational definitions for the main variables. Since research methods vary enormously, the choice of the appropriate methodology relies on your decision. We recommend you to discuss this with your advisor.

- Results and discussion

The results and discussion are often combined but can be presented in two chapters. However, make sure that at first, you should demonstrate what you found in each set of results before you begin discussion. For instance, when you carried out a quantitative study, the general principle is to state statistical results in a table or figure. Then you can interpret the significant statistical effects of a test and inform the reader of the meaning of the effects.

In general, most research need discussion. What do the statistical effects mean? What are the gaps between the existing literature and your outcomes, and why? What implications from your research can be drawn?

- References

References should be arranged first alphabetically and then further sorted chronologically if necessary. More than one reference from the same author(s) in the same year must be identified by the letters "a", "b", "c", etc., placed after the year of publication.

Examples:

Drucker, P., Hanraads, J., and Lupton, R.A. (2000), The art of writing a scientific article, *Journal of Scientific Communication*, vol. 163, 51–59.

5. Thesis Format Requirements(Please refer to the following when you submit the thesis.)
