

4th Asian Legislative Experts Symposium

The Korean Ministry of Government Legislation has held the annual Asian Legislative Experts Symposium (ALES) since 2013 with the goal of developing legal reform strategies to address common challenges that Asian countries all face. Building upon the success of previous symposiums, including the 2nd symposium held under the theme of 'IT industry legislation' and the 3rd under 'legislation on urban development' the 4th ALES will be held under the theme of 'legal reform strategies for enhancing efficiency of the ASEAN transport systems,' which are faced with serious traffic congestions due to rapid economic growth and urbanization.

The symposium is designed to generate a blueprint for legal reform strategies for advancing the Korean and ASEAN transport systems by providing a platform for the countries to share legislative development experiences that buttressed the development in transport & public transportation systems. The Korean and ASEAN transport laws will be examined, and legal reform strategies for further development of the public transportation system will be discussed at the event. We are pleased to invite you to the 4th ALES where your attendance will be greatly valued and appreciated.
