Citigroup Inc (C.N) will combine its retail banking and mortgage operations under Jonathan Larsen, according to an internal memo seen by Reuters, in the second senior promotion for a veteran of the bank's Asian franchise this year.

The U.S. bank's Asia Pacific chief Stephen Bird in April became the global head of Citi's consumer bank, in a move seen by analysts as rewarding the U.S. lender's strategy in the region.

Larsen, currently global head of retail banking, previously ran Citi's Singapore unit and spearheaded the lender's push in credit cards in Asia. Citi's Asian franchise now has 12 of the lender's 24 consumer banking markets globally, and contributes a fifth of global profits.

"Citi Asia is a sign of where Citigroup as a whole potentially can go," CLSA analyst Mike Mayo said in a research note prior to the announcements. The lender's strategy in the region has been to move from targeting the mass market to richer 'mass affluent' customers, Mayo wrote.

microeconomics and macroeconomics. Microeconomics examines the behavior of basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions. Individual agents may include, for example, households, firms, buyers, and sellers. Macroeconomics analyzes the entire economy (meaning aggregated production, consumption, savings, and investment) and issues affecting it, including unemployment of resources (labor, capital, and land), inflation, economic growth, and the public policies that address these issues (monetary, fiscal, and other policies).

Other broad distinctions within economics include those between positive economics, describing "what is," and normative economics, advocating "what ought to be"; between economic theory and applied economics; between rational and behavioral economics; and between mainstream economics (more "orthodox" and dealing with the "rationality-individualism-equilibrium nexus") and heterodox economics (more "radical" and dealing with the "institutions-history-social structure nexus").<sup>[3][4]</sup>

Besides the traditional concern in production, distribution, and consumption in an economy, economic analysis may be applied throughout society, as in business, finance, health care, and government. Economic analyses may also be applied to such diverse subjects as crime,<sup>[5]</sup> education,<sup>[6]</sup> the family, law, politics, religion,<sup>[7]</sup> social institutions, war,<sup>[8]</sup> science,<sup>[9]</sup> and the environment.<sup>[10]</sup> Education, for example, requires time, effort, and expenses, plus the foregone income and experience, yet these losses can be weighted against future benefits education may bring to the agent or the economy.
